## INTERNATIONAL PRELIMINARY REPORT ON PATENTABILITY (Chapter I of the Patent Cooperation Treaty)

### (PCT Rule 44bis)

Applicant's or agent's file reference 002-ST-04-PCT	FOR FURTHER ACTION	Sec item 4 below		
International application No. PCT/IT2005/000081	International filing date (day/month/year) Priority date (day/month/year) 16 February 2005 (16.02.2005) Priority date (day/month/year) 01 April 2004 (01.04.2004)			
International Patent Classification (8th edition unless older edition indicated) See relevant information in Form PCT/ISA/237				
Applicant SIGMA-TAU INDUSTRIE FARMACEUTICHE RIUNITE S.P.A.				

1.	This international preliminary report on patentability (Chapter I) is issued by the International Bureau on behalf of the International Searching Authority under Rule 44 bis.1(a).		
2.	This REPORT consists of a total of 6 sheets, including this cover sheet.		
	In the attached sheets, any refere to the international preliminary r	nce to the written opinion of the International Searching Authority should be read as a reference eport on patentability (Chapter I) instead.	
3.	This report contains indications relating to the following items:		
	Hox No. 1	Basis of the report	
	Box No. II	Priority	
	Box No. III	Non-establishment of opinion with regard to novelty, inventive step and industrial applicability	
	Box No. IV	Lack of unity of invention	
	Box No. V	Reasoned statement under Article 35(2) with regard to novelty, inventive step or industrial applicability; citations and explanations supporting such statement	
	Box No. VI	Certain documents cited	
	Box No. VII	Certain defects in the International application	
	Box No. VIII	Certain observations on the international application	
4.	The International Bureau will conou, except where the applicant n date (Rule 44bis .2).	mmunicate this report to designated Offices in accordance with Rules $44bis.3(e)$ and $93bis.1$ but makes an express request under Article $23(2)$ , before the expiration of $30$ months from the priority	

	Date of issuance of this report 04 October 2006 (04.10.2006)
The International Bureau of WIPO 34, chemin des Colombettes 1211 Geneva 20, Switzerland	Authorized officer Simin Baharlou

- ⊠ Box No. VI Certain documents cited
   □ Box No. VII Certain defects in the international application

This opinion contains indications relating to the following items:

Box No. VIII Certain observations on the International application

#### 2. FURTHER ACTION

If a demand for international preliminary examination is made, this opinion will usually be considered to be a written opinion of the international Preliminary Examining Authority (\*19EA\*). However, this does not apply where the applicant chooses an Authority other than this one to be the IPEA and the chosen IPEA has notified the international Bureau under Rule 66.1bis(b) that written opinions of this international Searching Authority will not be so considered.

If this opinion is, as provided above, considered to be a written opinion of the IPEA, the applicant is invited to submit to the IPEA a written reply together, where appropriate, with amendments, before the application of three months from the date of mailing of Form PCT/ISA/220 or before the expiration of 22 months from the priority date, whichever expires later.

For further options, see Form PCT/ISA/220.

For further details, see notes to Form PCT/ISA/220.

Box No. VI Certain documents cited

 Certain published documents (Rules 43bis.1 and 70.10) and /or

2. Non-written disclosures (Rules 43bis.1 and 70.9)

see form 210

Box No. VIII Certain observations on the international application

The following observations on the clarity of the claims, description, and drawings or on the question whether the claims are fully supported by the description, are made:

see separate sheet

# WRITTEN OPINION OF THE INTERNATIONAL SEARCHING AUTHORITY (SEPARATE SHEET)

International application No.

PCT/IT2005/000081

### Re Item V

Reasoned statement with regard to novelty, Inventive step or Industrial applicability; citations and explanations supporting such statement

The present application relates to photocrosslinked PHEA-GMA-AA polymers, their compositions and their use as drug carriers, especially e.g. for acylcamitine esters.

### Reference is made to the following documents:

- D1: PITARRESI G ET AL: BIOMATERIALS, vol. 25, no. 18, (2004), pages 4333-4343, disclosing photocrosslinked PHEA-GMA-AA polymers as in the present application, and their use as drug carriers;
- D2: MANDRACCHIA DELIA ET AL: BIOMACROMOLECULES, vol. 5, no. 5, (2004), pages 1973-1982, cited in the application, disclosing the same photocrosslinked PHEA-GMA-AA polymers as in the present application and their use as drug carriers; D3: US 4 071 508 A, disclosing anionic hydrogels constituted by three dimensional networks, comprising acid comonomers and photopolymerizable; D4: US 6 458 386 B1, disclosing crosslinked gelatin or dextran preparations for wound
  - L4: US 6 458 386 B1 , disclosing crosslinked gelatin or dextran preparations for wound dressings.
- D5: WO 00/45792 A, disclosing hydrogel particles for needleless injection;
  D6: US 2003/152623 A1, disclosing pH-responsive "microgels" as drug carriers;
  D7: GIAMMONA G ET AL: POLYMER, vol. 38, no. 13, (1997),
  pages 3315-3323, disclosing photocrossilinked polymers of PHEA GMA;
  D8: GIAMMONA G ET AL: BBA GENERAL SUBJECTS, ELSEVIER SCIENCE
  PUBLISHERS, NL, vol. 1428, no. 1, (1999), pages 29-38, disclosing the same
  photocrosslinked polymers of PHEA GMA; no further acid comonomers

The use of anionic crosslinked hydrogels for the production of matrices useful as drug carriers is well known in art (D3-D6, many others could be cited). The presence of acidic comonomers and the fact that the polymers can be crosslinked via irradiation with UV, gamma or other high energy radiation is also well known. According to the composition of the polymers, pH responsive behaviour can be obtained (e.g. D6); therefore, the subject-matter of present claims 1,2,5-11,14-17,19 is not considered novel as required by the PCT Art. 33(1) and (2).

### WRITTEN OPINION OF THE INTERNATIONAL SEARCHING AUTHORITY (SEPARATE SHEET)

International application No.

PCT/IT2005/000081

The particular polymers used in the present application in the examples are not described in any of the prepublished cited documents, as well as their use as carriers for acvicantiline esters.

Similar polymers are used in D7 and D8. However, the latter documents fail to disclose the additional reaction with a further addic comonomer like AA or MAA. The problem would be to Improve the obtention process of the hydrogels. The solution proposed by the present application is to add AA or MAA to the known PHG. Apparently this allows to crosslink without the addition of initiators by simple Irradiation. Thus, an inventive step could be acknowledged to present claims 3,4.

PH-dependent release hydrogel matrix preparations fo acylcarnitines with good release properties in the intestinal tract are not disclosed nor suggested in the cited prior art. Claims 12, 13 and 18 could be considered inventive as well.

### Re Item VI

### Certain documents cited

The potentially relevant intermediate documents D1 and D2 are quoted according to Rules 70.10 and 64.3 PCT.

### Re Item VIII

Certain observations on the International application

The expression "suitably" in claim 1 is considered unclear (Art. 6 PCT).
